

Working Student - JavaScript Frontend Development (m/w/d)

Headquarter Munich

About ParkHere

ParkHere is a high-tech company, which provides holistic parking solutions and mobility concepts for corporates and the real estate industry. Consisting of IoT hardware, software products, and mobile apps, ParkHere helps to optimize and digitalize parking spaces and make them more profitable. The unique solutions for efficient and sustainable mobility are built for real estate managers and parking operators, who are willing to improve the parking situation and make it more efficient. Companies such as Telefónica, Henkel, IONOS, and Giesecke + Devrient already rely on the individually configurable complete solution and expert knowledge of ParkHere.

Responsibility:

- Become a part of the ParkHere Software Development team and participate in the entire agile/test-driven software development cycle
- Develop major components of the ParkHere OS
- Working in close collaboration with other developers, product owners, and product designers in an agile work environment
- Contribute to a culture of sharing knowledge, best practices and standards as well as promoting cooperation and communication within your team

Requirements:

- Student enrolled in computer science or a comparable field
- Passion for software development paired with an analytical mindset
- Initial practical experience with JavaScript - ideally basic knowledge of React Native
- Flexible, reliable and organized way of working as well as open-mindedness and motivation to continuously broaden your horizon
- Excellent English language skills

Benefits:

- Exciting start-up environment with a large network
- Motivating working atmosphere with innovative projects
- Creative flexibility and independent project management
- Flexible working hours
- Joint activities in the team
